Specialist installer of digital ready TV aerial and satellite systems, for reception of Freesat, Freeview, Sky and International language channels throughout Reading, Berkshire and South, Oxfordshire

Digital satellite and aerial installers for Reading and Berkshire

Get ready for digital switchover

We specialise in the installation and maintenance of TV aerials for digital reception, satellite dishes and integrated distribution systems.

With Digital Switchover around the corner, it may be time to upgrade your old analogue aerial and distribution system. Freeview is now well established and requires an aerial suitable for digital reception, your existing aerial may be OK, we are happy to attend your property and test with the most up to date spectrum analysis equipment.

Freesat has now been launched to offer a digital television solution for those who cannot have an aerial or are unable to receive Freeview, this requires the installation of a small satellite dish, High Definition, HD, and PVR models of Freesat receivers are now available. We are here to advise on how best to upgrade and future proof your system in the most economic way.

As a small business we rely on recommendation, so customer

satisfaction is of prime importance to our successful operation. [Take a look at our gallery of installations](#)

When you contact 1towatch, you will be referred to someone who actually carries out the work, so rest assured that any information you receive will be accurate and up to date.

We work in conjunction with many other specialist trades, including Audio Visual installation experts and certified Electrical contractors, so no job is too small, or too complex. If we can't do it, we know someone who can.

News Flash

Oxford Transmitter Low Power

Essential works and testing of the new Oxford main antenna are scheduled to take place over three days from Monday 13 September to Wednesday 15 September 2010.

- During these days, analogue and DTT services will operate at slightly reduced power between 9am and 6pm, which may cause reception difficulties for some viewers, including some previously unaffected.*
- Overnight, on 13 and 14 September from 6pm to 9am, DTT services will revert to the reserve antenna at their previous operating levels.*
- The new main antenna should be fully operational from Thursday 16 September (subject to good weather conditions and testing being completed).*
- Switchover next year will improve the quality of Freeview coverage around Oxford and also make services available for the first time to thousands of Oxfordshire viewers watching local 'relay' transmitters.*
